GENERAL NEWS.

New York, August 1.

It is understood Wm. B. Astor desired having

him at Stratford, and having any intention of

completing the Washington monument at his own expense.

General Newton estimates it will require a mil-

lion dollars and two years' work to remove the rocks at "Hell Gate."

It is said that a whole line of railway is soon

to be illuminated at night by a newly discovered

electric light.

The office of Malone & Butterfield, 92 William

street, was robbed last Thursday noon by a

gang of three men in masks, who took \$500 in notes, drafts and checks, and \$2000 currency.

The latter is, however, the only loss of the firm,

payment of the same having been stopped.

The Matuts were defeated at battle held yesterday

by the Mary J. Club, Boston, 27 to 27.

The Cubans, under General Jose de la

Jordan and Francisco, with 10,000 armed

troops, attacked General Latorre near Santiago

de Cuba, routed his forces and captured himself.

The rumor is that he has since been shot to

death.

The Spanish General Fuerte has been defeated

between Nuevitas and Puerto Principe.

His son, with a large portion of his command, is

said to have joined the Cuban army. A cargo

of slaves has been landed at Colorado Key for a

Spanish planter.

New York, August 1.

Letters from Havana represent the Cubans

as being greatly dispirited with the

course affairs are taking in the interior, and also

that he apprehends some opposition to the depar-

ture of Espeir, on the part of the volun-

teers.

In consequence of the unceasing efforts of

the American Consul, Theodore Cabina, Joseph M.

Ortega, Sebastian Pintado, and Antonio

Ortega, American citizens who have been impri-

gned at Havana since January last, have been re-

leased.

The Board of Health says they have effectively

cleared the east part of the city of cholera, yellow

fever, small pox, etc., and all other diseases.

They are still under control.

The annual meeting of pews in the M. E. Church takes place this evening at 8 o'clock.

A patent, No. 933, was on the 27th last, is sent to Geo. M. Mowbray of this city, for a new method of exploding Nitro-glycerine.

The Senatorial Conference at Franklin on Friday last nominated General Harrison Allen, or Warren, as candidate for State Senator.

Attention is directed to an advertisement of "child lost"—a little girl who disappeared from the home of her parents, on Franklin street, on the 20th of July.

On Saturday afternoon two women, whose names we did not learn, got into a fight near the railroad depot, Venango City. One of them knocked the other down, and then, with a stone, literally beat her head into a jelly. It is feared the injured woman will die.

A troutin match for a purse of \$200 came off at the Driving Park on Saturday, between L. W. Brown's horse Blue Luck, and Nison Waters' bay horse Bay Billy—best three to five, to harness. Blue Luck won the first heat, in 30 2/3, and Bay Billy the succeeding three, in 30 2/3, and 25 1/2. The day was pleasant and a large crowd was in attendance.

The Rev. R. H. Austin of Meadville, preached at the Baptist Church last evening to a large congregation. At the close of the service Mr. Austin made an appeal to the congregation for subscriptions toward relieving the poverty of his financial burden, and obtained pledges to the amount of over \$3,000, making \$4,800 subscribed since the dedication. The largest sum last evening was that of Gible, Russell & Co., \$1,000.

The Pittsburgh Gazette reviews the discussion of Senator Lowry's canal project. It says two or three millions of dollars would enlarge the Erie and Beaver canals sufficiently to allow of the passage of vessels loaded with ore at Marquette through to the Ohio, and freight of all sorts could thus have a way opened to the Mississippi and the Gulf. Erie would become one of the most important ports on the lakes, and Pittsburgh would reap a rich commercial harvest.

A BAD DROWNING AFFAIR—Yesterday afternoon, about four o'clock, a boy named Francis Larkin, and another lad, recently employed as messenger for the Atlantic and Pacific Telegraph Co., by the name of Michael Kenney, were crossing the bridge near what is termed the upper dam, about one mile below the city, when by some mischance Larkin fell in and Kenney immediately jumped in to his rescue. Both were drowned. Some difficulty was experienced in finding the bodies, owing to the depth of water at that point, which is from ten to twelve feet. Larkin's body was found a short distance from where he was last seen soon after the occurrence, but the other was not found until three hours later. Both were brought to their homes in the city. It was rumored upon the streets that these boys were drowned, but this is an error, as those who saw the lads just before the accident state that there were two only, and one lost his life in the vain attempt to rescue his companion.

VIOLATION OF ORDINANCE—A suit was tried before Justice Perry, on Saturday, which excited considerable interest, viz.: the city of Titusville vs. H. M. Hooper, charged with violating a city ordinance. It seems that Hooper on Saturday morning removed from a magazine or the west end of Main street, a large number of boxes filled with fulminating powder, and two torpedoes, for exploding in oil wells. Chief of Police House was notified that Hooper was hauling these materials through town in violation of ordinance, and arrested him in transit through the south part of the city, and brought him before Justice Perry. City Attorney Wilcox appeared for the prosecution, and F. B. Guthrie, Esq., for the defendant. The ordinance referred to originally applied only to the storage and transportation of nitro-glycerine. It was subsequently so amended as to include all explosive materials, and the defense allege that it was ineffective at the date of this prosecution, for the reason that it had not been published for the period of ten days after its approval by the Mayor, as required by the city charter. After investigation of the matter, however, the magistrate held that the ordinance had been violated, and accordingly fined the defendant \$100 and costs. The case is to be appealed.

BURGLARY AT FRANKLIN—Some time during Thursday night last, the Sheriff's office Frank ill, was entered by burglars and the safe which was used by the Sheriff and County Treasurer was blown open and rifled. There was only \$30 in the safe, which was carried off. Before breaking the safe the burglars opened three rooms which had been locked the night previous. Operations were commenced on the safe with powder, but these not succeeding an iron bar was used to break in the door of the safe, after which powder was then placed in the hole made with the bar, and exploded.

FRESH vegetables and small fruits, boots, new shoes, cottonware, bureaus, received ready to express, at Shatto's, 27 Franklin street, near the New York Market.

Democratic Predictions.

This is a fine summer day, and the haze that hangs over the meadows and half conceals the hill tops affects the senses. What is seen is seen dimly; what is heard is like the faint sound of a distant echo. And yet the imagination is at work, for even if the bodily functions do seem suspended, like the motionless branches of the trees, we fall into a delicious reverie. As there are none of our own species to converse with, we begin to talk to the rocks, the brooks, the trees, the flowers, and the various insects that haunt the woods and fill the air. In the midst of this reverie we become conscious of an increased tenderness of feeling, until it seems like a barbarous thing to tread upon the flowers that grow in the tangled path. Here is a rock not covered even with moss upon which we may sit and hold a dreamy conversation. Conversation with what, and with whom? The living creatures and inanimate objects to be sure. While thus engrossed a few passages come to mind which intensify the feelings. As in Paradise Lost:

"Is not the earth
With various living creatures, and the air
Its plant and all these at thy command.
To come and play b for b? Known thou not,
Their language and their ways? Known thou not,
And then, to appropriate to the place, a passage in the "Spanish Grey":

"When you leave killing time to sit the brutes,
For the point of w, o, I would chose
To know the mind that sure beyond the wings
Of bees, in building hives, and in the wings
Of bees, in building hives, and in the wings
And true am I up to, rather than to know
The thoughts of warlike."

The reader suggests a passage in the Tales of the Alabamas:

"By degrees this loving disposition" (of Prince Ahmed) "began to extend to loannate &c; & he had his favorite flowers, which he cherished with tender assiduity; then he became attached to various trees, and there was one in particular of a graceful form and drooping foliage, on which he lavished his amorous devotion, giving his name on its bark, hanging garlands on its branches, and singing couplets in its praise, to the accompaniment of his lute."

A fish gushing in the water of the little stream near by, recalls the conversation between the "Commodore" and Eve in Cooper's "Home as Found":

"The last time I got a look at the old gentle man" (the Dog-soldier, or father of the Salmon) "I did not try to get him into the boat, but we sat and conversed for near two minutes—he on the water and I on the skiff. Conversation claimed Eve, and with a fat, rosy, young boy, a fish can talk as easily as one of ourselves; they are helpless as combat strength. The increase in the treasury receipts is a masterful graduation therefore, not because the balance is at present of great consequence, but is indicating that the floods of corruption are fast fairly started."

This suggests the following ludicrous lines for experiments often disturbed by the whimsical:

"The last time I got a look at the old gentle man" (the Dog-soldier, or father of the Salmon)

"I did not try to get him into the boat, but we sat and conversed for near two minutes—he on the water and I on the skiff. Conversation claimed Eve, and with a fat, rosy, young boy, a fish can talk as easily as one of ourselves; they are helpless as combat strength. The increase in the treasury receipts is a masterful graduation therefore, not because the balance is at present of great consequence, but is indicating that the floods of corruption are fast fairly started."

Testing Petroleum Oil.

From F. B. Pease's "Oil Circular":

"The last time I got a look at the old gentle man" (the Dog-soldier, or father of the Salmon)

"I did not try to get him into the boat, but we sat and conversed for near two minutes—he on the water and I on the skiff. Conversation claimed Eve, and with a fat, rosy, young boy, a fish can talk as easily as one of ourselves; they are helpless as combat strength. The increase in the treasury receipts is a masterful graduation therefore, not because the balance is at present of great consequence, but is indicating that the floods of corruption are fast fairly started."

The passage we have quoted from Cooper reminds us of an assertion of "Leather Stocking," in the "Pioneers":

"As I follow the bounds, and if there's an opening they'll scent it out, their noses give them the same as man's reason."

As we are now in a full somnolent state, the order of association is not very methodical, and so we read a thought from "Homeward Bound," in which Captain Truck advances his theory concerning oil:

"It is an easy supposition that they can understand each other, as that horses and dogs understand each other. We know nothing about them, and therefore it behoves us to say nothing, it is indeed conversed only by the things they understand, half the words might be struck out."

But the cries of the children, barking in the woods, di-pet these day dreams, just as the plain talk of the poor prisoner in "Piccoda" to the tender plant he raised between chinks of the stones, steals upon us. We must now quit the woods, but before we go we wish to say that there is a very significant sentence in the London Quarterly Review, of January, 1869, in an article on "Avalanche and Blasts," as follows: "We are far from having a right to assert that plants do not feel." There is a world of thought in all these subtilties.

The force of the explosion drove pieces of the car and splinters in all directions, and blew three or four boards off the engine house. One piece of tin was driven entirely through a piece of tin. Their injuries are not considered dangerous.

Good Pure Water

FOR EVERYBODY.

ROSE'S PAT. WATER WELL

IS NOW ACKNOWLEDGED TO BE

SUPERIOR TO ALL OTHERS.

as thousands can testify.

Every Family should have one of

these Wells.

STATE AND COUNTY RIGHTS FOR SALE.

Great inducements to purchasers.

These walls will hold a barrel

of water in three minutes

The advantages claimed over ordinary wells are:

First. They descend below the

surface water, and tap the purest waters.

Second. They effectively ex-

clude both air and surface water,

and contains no vacuum for im-

porting air, and therefore is pure.

Third. They are made of die-

patch, in numerous sizes, and

can be easily repaired.

Fourth. They are made of re-

sistant materials, and will not

rot, or decay, where there is

no water, or soil, or dirt, or

rocks, or stones, or rocks, or

stones, or rocks, or rocks, or

rocks, or stones, or rocks, or
